SECRET

#### ESTABLISHMENT OF QKBROIL FIELD BASE

1. QKGUAVA, because of its proximity to the target area, appears to be the logical base for QKBROIL operations. If we are to have 20 agents and two bases inside the country by the deadline set in the project -- December 1951-March 1952, a field base should be established as soon as possible. Accordingly, a schedule of action has been prepared and is submitted herewith for consideration and approval.

2. Recruitment of Agent Personnel. The senior operations officer will leave for ZNRUTH in ~~October~~ to set up a system for recruiting, through cutouts, 20 agents by the beginning of 1952 and an additional 50-100 agents by the end of 1952.

3. Guard Company. It is proposed that a JBTRADE guard company be established in JBHOMER to serve as holding area and agent pool prior to training.

4. Agent Training - JBHOMER. Arrangements have been made to train the first twenty agents at ZACACTUS school in JBHOMER in ~~November-December~~ December 1951. Two PM instructors, under LCSASSY cover, have completed training and will depart not later than 29 October in order to become familiar with training facilities prior to agent arrivals. [ ] may also be dispatched to the school in November to aid in the training and in interpreting. The W/T instructor should depart approximately 25 ~~October~~. He is the only instructor who speaks JBTRADE fluently and probably will have to double as interpreter. [ ] is to be sent to JBHOMER approximately 15 November to aid in the training program as medical doctor, advisor, interpreter, and possibly instructor on political affairs and motives. After the four weeks' course at the school, training will be continued by QKBROIL personnel at a holding area, to be procured in JBHOMER or XNJUNCO.

*Cutout/recruiter*

5. Agent Training - XNJUNCO. If arrangements with the XNJUNCOS permit, it is proposed that a joint QKBROIL-QKSTAIR training area for up to 50 agents be established in XNJUNCO. Instructors for this school are presently available and would be furnished by QKBROIL And QKSTAIR. A ten weeks' training course, minimum, should be set up at this school.

6. Base Station. It is

- 2 -

6. Base Station. It is proposed that the entire project field staff be based in XNJUNCO, phased as follows:

- a. December 1951 - ☐ ☐
- b. January 1952 - ☐ ☐  
one secretary.
- c. February 1952 - ☐ ☐  
two secretaries.
- d. March 1952 - ☐ ☐ one secretary.
- e. April-May-June - remainder of Administration, Operations and Training Staff, approximately 20 people.
- f. Contract agents and employees presently scheduled for QKGUAVA:

- (1) February 1952 - ☐ ☐
- (2) Feb. 1952 - ☐ ☐

7. Propaganda Staff. Initially, the propaganda staff will be based in LCDRINK. It is proposed that, as soon as arrangements can be made with the XNJUNCOS, the entire unit, three PBPRIMES and approximately 8 JBTRADES, be moved to QKGUAVA. A minimum of four weeks after the staff has reached LCDRINK will be required to prepare broadcasts. The core of the broadcast staff should reach LCDRINK not later than 15 January 1952 as broadcasts will be initiated prior to the first agent drops, which will start probably in April 1952.

8. Communications at Base Station. A communications unit should be established in XNJUNCO to handle agent communications and the propaganda broadcasts. There are seven communications positions on the QKBROIL T/O, three of which have been filled and the technicians dispatched to LCDRINK under TPIHRESY cover. A communication channel between QKBROIL field staff in QKGUAVA and headquarters staff should be established prior to initiation of operations.

9. Cover at Base Station. We have been informed that twelve military slots have been procured for our use in QKGUAVA. These slots may be used for the Deputy Field Chief and the operations and training sections. For obvious reasons the Project Field Chief,

his secretary,

his secretary, the administrative officer and the administrative assistant (finance) as a minimum, should be under ZASEAL ☐ ☐ in order to provide command authority with a strong position, control of communications and suitable cover (the man under consideration for acting chief is a ☐ ☐). The intelligence staff must be under some type of official cover because of the nature of the work and to provide for security for classified material.

10. Supply at Base Station. Establishment of a supply channel to QKGUAVA should proceed without delay in order that shipment of necessary equipment and supplies may be started.

11. Secure Areas Needed in XNJUNCO. Negotiations for the following areas should be initiated as soon as possible in order that the areas may be equipped for use prior to initiation of operations in the spring 1952:

- a. Training area.
- b. Holding area.
- c. 2-3 safe-houses.
- d. Warehouse.
- e. Site for radio station.

12. Resume of Proposals:

a. Establishment of an integrated QKBROIL field base in QKGUAVA beginning with an initial cadre of three in December 1951 and gradually building up to full strength of approximately thirty by June 1952.

b. Establishment of a communications unit to handle agent communications and black broadcasts.

c. Establishment of a communications channel between QKBROIL QKGUAVA field base and headquarters staff.

d. Establishment and equipment of the secure areas listed in paragraph 11.

e. Establishment of the PW unit in QKGUAVA in the spring 1952.

f. Establishment of a

f. Establishment of a joint QKBROIL-QKSTAIR training area for up to 50 agents in XNJUNCO.

g. Establishment of a JBTRADE Guard Company in JEHOMER.

h. Establishment of a supply channel to QKGUAVA.

13. Conclusion. If, in the near future, arrangements can be made with the XNJUNCOS for basing all our activities in the QKGUAVA area, the project field staff should be dispatched in a series of groups without delay. Setting up adequate facilities at a new base will be time consuming and tedious, and it is believed that as many as possible of the QKBROIL staff should be on hand in the field to aid in the preliminary work and to familiarize themselves with local problems and difficulties.
